- 14 plants in Europe, North America and North Africa
- 5 cullet treatment stations

Why glass?

1 kg of used glass → 1 kg of new glass!

100% and infinitely recyclable

Glass can be recycled endlessly without losing quality.

Safe & Pure

Glass is free of harmful chemicals, keeping food and drinks safe.

Natural material

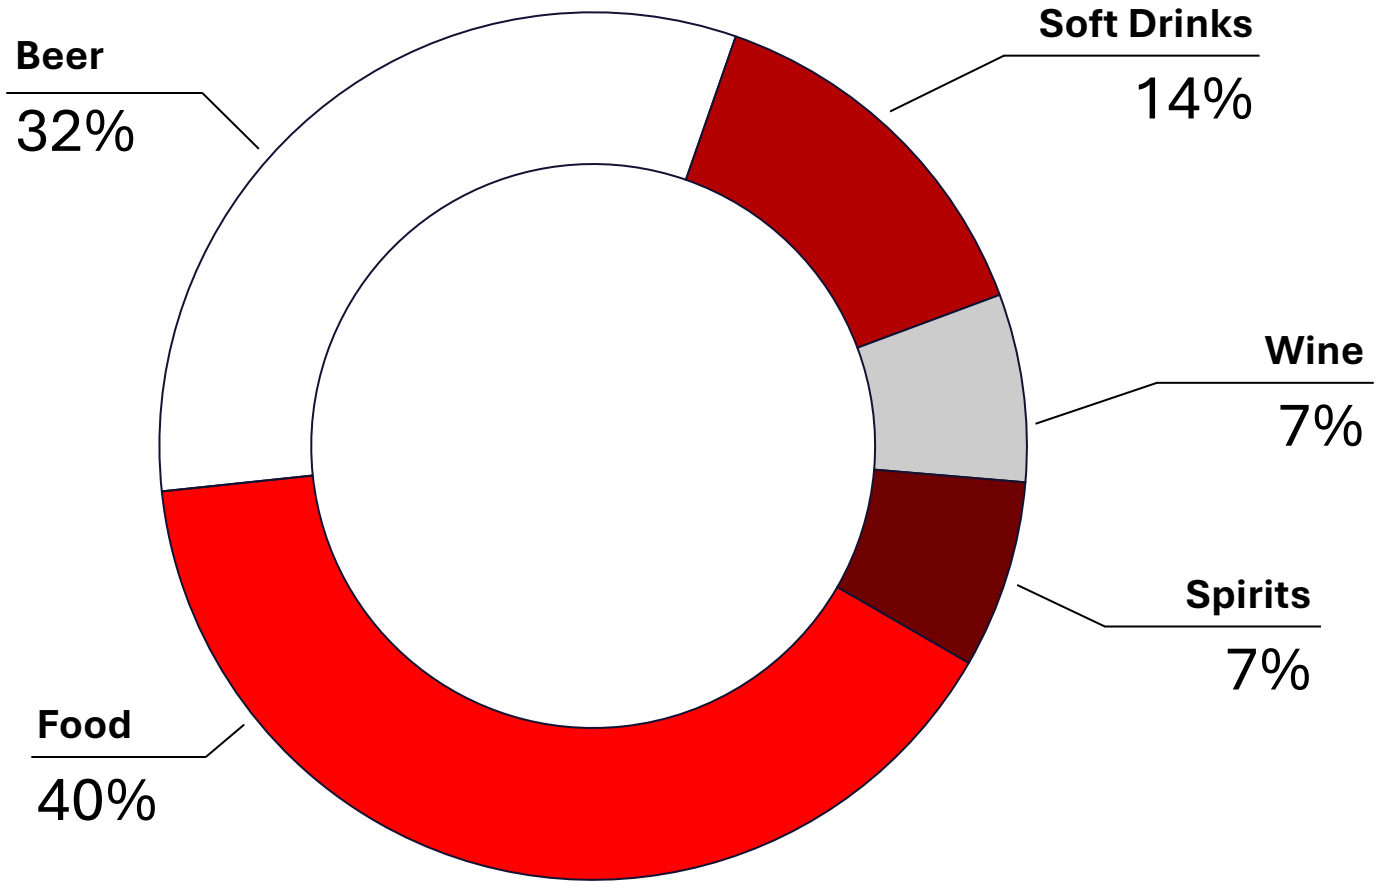

Glass is made from sand, soda ash, and limestone, making it entirely natural.

Preserves taste

Glass protects the original taste by preserving the flavor, color, and texture without any contamination.

Packaging at scale

Our Segments

Every year, BA Glass produces more than 12 billion bottles and jars in different colours and formats. Food and oils lead the mix, followed by beer and soft drinks; wine and spirits each represent 7%.
